**Hoquiam Waterfront Revitalization Project**

- Acquire waterfront property
- Design and permitting for boat launch renovation and marina construction.

## Hoquiam Waterfront Revitalization Project

The City of Hoquiam has applied for and received grant funding from the State of Washington to acquire property along the Hoquiam River in order to complete design and permitting to renovate the Levee Street Boat Launch and study the feasibility of a marina in the area. The funding totals \$155,550 and the City must match the grant with \$52,200. The City is currently seeking donations for this first phase of the project.

The citizens of Hoquiam identified revitalization of their waterfront as an important goal in Hometown Hoquiam, a citizen led visioning process. It was also identified as a strategic goal in the City's new Economic Development Plan.

### Progress to date

The City received over \$200,000 in federal funding to construct a sidewalk along the waterfront from 6th to 9th Street. Work was completed in 2011. Residents and visitors now have an unrivaled view of the Hoquiam River as they stroll along Levee Street. Pervious concrete was also installed to help with stormwater treatment and protect the important natural resource of the Hoquiam River.

### Future phases

Once design and permitting is completed for the boat launch renovation and potential marina/moorage area, the City will pursue grant funding and donations to construct the improvements. Depending upon cost estimates and funding sources, this could be done in phases or all at once.

### How can you help?

Donations made will help fund the matching share of the grant to acquire property and complete design and permitting for improvements. If you would like to help fund future construction of the project would be happy to talk to you about options.
